Access Code: 251-825-413

TOPICS ON TAP - SPRING 2018

11 April 2018: *New National Datum 2022*

20 June 2018: *DoD Installations Spatial Data Governance-Improving Installation Lifecycle Management*

LISTEN IN- WHERE MATTERS. Where are enemy/friendly forces? Where are the power-transmission towers requiring restoration? Where are the Ebola cases? Where are my assets? Where are the buried utilities? Where are the endangered species? Where is the local community placing a wind farm? Where should we develop gray and green infrastructure improving shoreline resilience? Where do I go to integrate, analyze and visualize the where, who, what, when and how to improve understanding supporting informed decisions? The simple answer- seek out your Geospatial Engineer professionals.

From the basing space to the battlespace Geospatial Engineers are your team's cross-functional resource to better understand your operating environment. To learn more about leveraging those skilled in the art and science of "where" check out the SAME Geospatial Webinar Series "Visualizing Better Decisions."

DoD Installations Spatial Data Governance-Improving Installation Lifecycle Management

Presented by: Mr. David LaBranche, PE, Geospatial Information Officer, Defense Installations Spatial Data Infrastructure (DISDI), Office of the Assistant Secretary of Defense for Energy, Installations, and Environment

Date: June 20th, 2018 (1:00pm-1:45pm ET)

Join the SAME Geospatial Working Group discussing DoD Installations data governance and standards that enable data integration and exploitation supporting better management of DoD installations and bases around the globe.

Join from your computer, tablet or smartphone.
