Memorandum for Record

SUBJECT: Validation of Attendance for Professional Development Hours

This memorandum provides the formal documentation of attendance and one (1.0) professional development hour earned for the presentation on 23 April 2020, via GoToMeeting.

This presentation was presented by Rick Girouard, PE (Environmental Program Manager with Ahtna) on recent efforts to remediate a site contaminated by dry cleaning solvents located on USCG Base Kodiak, AK. Dry cleaning solvents contaminated a 25-foot thick horizon of soil overlying bedrock, in an area abutting a building foundation. In October 2016, approximately 357 tons of contaminated soil were removed down to bedrock using large-diameter auger and casing techniques. Through methods covered in the presentation, two-and-a-half years and seven rounds of post-excavation groundwater monitoring have occurred, and geochemical parameters, chlorinated ethenes, organic byproducts of fermentation, ethene and ethane and bacterial populations have been tracked.

We have a recorded version of the Webinar with a “roll call” taken at the beginning to identify who was on the Webinar for this presentation for which they are seeking professional development hours. By my signature I am confirming the attendees listed in the attached attendance sheets were present for the aforementioned presentation.

A handwritten signature in blue ink, appearing to read "BPDuffy", written over a horizontal line.
