SAME President-Elect

PLENARY PRESENTATION

Society of
SAME
American Military Engineers
Guam Post

The GUAM
Industry Forum
2018

The Society of American Military Engineers leads collaborative efforts to identify and resolve national security infrastructure-related challenges. Founded in 1920, SAME unites public and private sector individuals, and organizations from across the architecture, engineering, construction, environmental and facility management, cyber security, project planning, contracting and acquisition, and related disciplines in support of national security.

SAME MISSION

Lead Collaborative efforts to identify and resolve national security infrastructure-related challenges.

2020 VISION

SAME is recognized as the multi-disciplined integrator of military, public, private, and academic national infrastructure-related capabilities to produce viable solutions.

A RICH LEGACY OF LEADERSHIP

“I have been a member of this Society since its inception... I have belonged to many distinguished groups but none in which I have a greater sense of honor than in the Society of American Military Engineers.”

General of the Army, Douglas MacArthur - 1956

INDUSTRY-GOVERNMENT ENGAGEMENT (IGE)

IGE is about sharing knowledge and best practices. The objective is to leverage industry, government, academic and private capabilities by facilitating dialogue, building trust, leading collaboration and developing creative solutions. There are many ways that SAME members can make a difference at all levels of IGE :

- Local Issues workshops
- Industry days
- CEO Roundtables
- Joint Table Top Exercise (TTE)
- Strategic partnerships with professional organizations
- Facilities Management Workshops
- DOD Briefs
- Joint Engineer Training Conference
- Small Business Conference

BUILDING RESILIENCE

PREPARE | RESPOND | RECOVER

“We are establishing at this time a Society of American Military Engineers. This society will serve no selfish purpose. It is dedicated to patriotism and national security. Its objects are, in brief, to promote solidarity and co-operation between engineers in civil and military life, to disseminate technical knowledge bearing upon progress in the art of war and the application of engineering science thereto, and to preserve and maintain the best standards and traditions of the profession, all in the interests of patriotism and national security.”

The Military Engineer magazine, January 1920

“I heard great feedback on the Facilities Management Workshop. We have a substantial list of good ideas to better plan, solicit, execute, and oversee Base Operating Support Contracts. I look forward to a real step forward in this area.”

Rear Admiral Bret J. Muilenburg
Commander, Naval Facilities
Engineering Command
Chief of Civil Engineers

DEVELOPING LEADERS & PRODUCING ENGINEERS

The next generation of leaders for the A/E/C is developed through engagement, mentoring and training. Each year SAME hosts several premier national events—including Leadership Development Programs. SAME also supports the development of new STEM professionals through a pipeline of activities for K-12 to college, and into professional life.

PREPARING VETERANS FOR THE A/E/C INDUSTRY

Transition Workshop & Job Fairs help to fill the national skilled labor shortage, and offers support to men and women who are transitioning out of the uniformed services as well as SAME members looking for a new career opportunity. They have the chance to hear from others who have successfully made the move from a uniform to a business suit, receive resume building and job interview training, and meet with companies, agencies and organizations that are hiring.

“The Young Member Council provides an outstanding opportunity to meet other Young Members and participate in SAME at the national level. It’s also a great way to learn about and help shape all events, training, leadership and mentorship opportunities throughout the society.”

Lt. Col. Matt Altman, Ph.D., P.E., F.SAME, USAF

“It was a great opportunity to receive guidance and mentorship from former fellow military members who have made the military-to civilian transition. There was so much that was said that truly inspired and encouraged me as I am navigating my own transition... the opportunity to connect with potential employers was an invaluable experience”

Lt. Col. Dave Hurley, USA (Ret.)
