Virtual Joint Engineering Training Conference: *Adapting for Today, and Tomorrow*

COVID-19 is impacting almost every aspect of daily life. For many organizations, agencies, and business, we may feel the impacts long after the public health emergency has ended. But supporting national security never stops. As the world faces these challenging times, it's now more important than ever to stay positive, stay connected, and stay focused on the mission ahead.

In an effort to adapt to the new reality, SAME is taking its Joint Engineering Training Conference (JETC) **VIRTUAL!** Going virtual has the potential to reach more members and non-members alike. It affords more people the opportunity to experience this great conference and stay up to speed with all that is happening in the federal A/E/C sector.

JETC will showcase government decision-makers and industry leaders and get a detailed look at how our profession is pivoting to tackle the infrastructure-related national security challenges we are all facing in this unprecedented environment.

The program highlights will include:

- SAME National President Transition
- Engineering Service Chiefs Panel
- Senior Government & Industry Leader Forums
- Virtual Exhibits Featuring Leading A/E/C Companies
- 8 Education & Training Blocks Featuring Over 35 sessions

JETC will include a Pre-Conference and training sessions from May 14-22, 2020. The formal JETC will be May 26-29, 2020.

For more information, visit:
www.samejetc.org
