

In 2009, SAME conducted a fund raising campaign to raise money to renovate its HQ, Century House. The exterior renovation, costing nearly \$200,000, was completed in September 2011. The renovation included restoration of the fourteen large windows, lead paint abatement, cleaning the façade, rebuilding the balcony over the front entrance, and restoring all the decorative components.

We will now begin the renovation of the large conference room and foyer on the first floor, which we hope to complete by the end of 2012. The conference room will be outfitted with newer presentation and Internet hardware to make it a first-rate multimedia conference room to coordinate SAME activities at all levels. As part of that renovation, SAME is planning to establish a “Gallery of Military Engineer Leaders.” This museum display area will feature historical references to engineer leaders, SAME artifacts, special books and other items that trace the history of Military Engineering. Appropriate archival displays will be installed to preserve these historical treasures.
